

SEPTEMBER 28-30

## 2012 LOBO/LANCAIR FLY-IN

### DOOR PRIZES!

Some of you are coming to the 2012 LOBO/Lancair Fly-In in Sedona, AZ to hang out with old friends and make new ones. Some of you want access to the incredible brain trust of information and to learn to better maintain and fly your Lancair professionally and safely. Some of you will experience one of the most beautiful pieces of landscape in the world. Some of you just want to look at all the Lancair eye candy flying in from all over the country. And finally, some of you are coming for the SWAG! (You know who you are.)

We have great news for the last group, because ForeFlight and One Mile Up have teamed up to bring you a software duo. ForeFlight is offering a one-year subscription to its premier iPhone/iPad flight planning app (device not included), featuring weather maps, airport data, moving map with charts and plates, and much more. One Mile Up offers Panel Planner J, an easy-to-use instrument panel planning program for Mac or PC. It features drag and drop simplicity: Position and reposition the full-color, photo-realistic instruments, avionics, and cockpit controls on a mockup of your instrument panel as much as you like. When you like what you see, print full-sized templates for marking/cutting your panel. All you have to do for a chance to own this state of the art software just sign up for the 2012 LOBO/Lancair fly-in—do it now!

For more information regarding the Fly-in please contact Lisa Williams or Claudette Colwell.
